## About This Content

Toposim US Southwest for FSX: Steam Edition provides LOD 12 / 10m Multi-LOD terrain mesh for the Southwest region of the United States, improving the accuracy of the default terrain mesh and offering a marked improvement to the landscape profile.

VFR flying over Southwestern United States has never been more realistic with lakes, mountains and ground undulations all where they should be.

*Please note this pack corrects the default terrain mesh and does not include any textures.*

This pack includes terrain mesh for the following states:

- Arizona
- New Mexico
- Texas
- Oklahoma

I like & have many regions from Toposim... But this add-on contains big error.  
Maybe it works in the native version of FSX, but It's not compatible with ORBX (I have global, vector & openLC).  
After installing add-on I can't start flight: I have error message "Your computer has run out available memory..." when a flight starts to be generated.

I was looking for the cause of the error. Found that after removing 3 (from 4) files error disappears:

- TOPOSIM\_DEM\_NorthAmerica\_UnitedStates\_Arizona\_LOD9-12.bgl
- TOPOSIM\_DEM\_NorthAmerica\_UnitedStates\_NewMexico\_LOD9-12.bgl
- TOPOSIM\_DEM\_NorthAmerica\_UnitedStates\_Texas\_LOD9-12.bgl

Maybe it works in the native version of FSX, but I have ORBX (global, vector & openLC).  
And I hope the developer will resolve the problem.. Could not load simulations with this DLC installed. When I attempt to start a flight simulation with Southwest installed, it would get to 6% on the load screen and then tell me that I have run out of memory. However, I have the Toposim US Midwest, West Coast, and Mountain West DLC installed and they work just fine!  
Would not recommend this particular DLC though. Please fix Toposim US Southwest!
